*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.*

## MACROECONOMIC POLICIES ON SHAKY FOUNDATIONS - WHITHER MAINSTREAM ECONOMICS

Metropolis Verlag Sep 2009, 2009. Taschenbuch. Condition: Neu. Neuware - The present economics crisis - the worst since the Great Depression - has already been changing the rules for macroeconomic policies. Only a few months ago leading economic policy institutions had advocated laissez faire policies and regarded inflation targeting as the 'golden rule' for monetary policy. Today the same think tanks recommend recapitalization of banks, non-conventional monetary policies and counter-cyclical fiscal policies. The theoretical basis for mainstream economic policy is the New Neoclassical Synthesis or the New Consensus Model (NCM), which is based on utility maximising representative agents with rational expectations in a dynamic stochastic general equilibrium (DSGE) approach. Keynesian and Post-Keynesian authors have long been critical with this modelling strategy and its policy implications. As has become clear by now, the NCM model is completely inappropriate to deal with the present global financial and real economic crisis. What are the consequences for economic theory and economic policies Will the mainstream view on the economy survive - with only minor reforms Is there any potential within mainstream economics which will transform the 'free market view' and the economic policy implications Since the present situation obviously is an opportunity for Post-Keynesian and other heterodox approaches, are these schools well equipped and ready to tackle the present problems And how can they have an impact, both on economic policies and on the future development of macroeconomics The chapters in this book address these questions from different angles. Content Introduction Eckhard Hein, Torsten Niechoj and Engelbert Stockhammer Microfoundations John E. King How did macro theory get so far off track, and what can heterodox macroeconomists do to get it back on track David Colander Towards a post-Keynesian consensus in macroeconomics: Reconciling the Cambridge and Wall Street views Marc Lavoie Explaining European unemployment with...
