Policy Press, United Kingdom, 2008. Paperback. Condition: New. Language: English . Brand New Book. Leadership and management are increasingly considered important drivers in terms of organisational performance. Yet, despite being viewed as essential components of partnership working, there is relatively little thoughtful work analysing the relationship between the two sets of ideas - posing practical difficulties for leaders and managers of partnerships who are looking for evidence or guidance. This book provides a robust guide to the leadership and management of partnerships. It summarises recent trends in policy, establishes what we can learn from research and practice and sets out useful frameworks and approaches to address a range of problems that partnerships face. It will be an essential aid to policy makers, managers and practitioners, providing a realistic account of the main characteristics and expectations of leadership and management in partnerships.
