Radiation Synthesis of Conducting Polyaniline and PANI/Ag Nanocomposites

By Ali Omer, Mohammed Amed / Saion, Elias

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Radiation Synthesis of Conducting Polymer | The radiation synthesis of conductive polymer is a unique technique for producing many desirable biocompatible materials in nanoscale level with magnificent applications due to less impurity and abundant product i.e. commercial product. This book contains sufficient information about the types of polymers, different methods of preparing polymers, and application of polymer generally and specifically the preparation of conductive polymers and polymer doped with nanoparticles metals. The targeting scientific fields are Medical engineering, Medical physics, Polymer processing (membranes suiting Methanol Fuel Cell, Gas separation and Biosensors) | Format: Paperback | Language/Sprache: english | 352 pp.

Reviews

This created pdf is fantastic. Indeed, it can be perform, nonetheless an interesting and amazing literature. Its been developed in an remarkably straightforward way and is particularly simply following i finished reading this publication by which in fact altered me, alter the way i really believe.

-- **Amanda Hand Jr.**

A must buy book if you need to adding benefit. Of course, it is actually perform, still an interesting and amazing literature. I am delighted to explain how this is basically the best book i actually have read through during my individual life and may be he best book for at any time.
