Jiangsu Science And Technology Publishing House, 2009. Soft cover. Condition: New. Since women anatomically have a uterus and its associated organs, and physiologically have menstruation, leukorrhea, pregnancy, labor and breast-feeding, there is an expected difference between women and men in terms of zang-fu organs, channels and collaterals, yin and yang, and qi and blood in their physiological activities of reproduction. The human body takes the zang-fu organs, and the channels and collaterals, as the fundamentals, and performs its function through qi and blood. The five aspects of menstruation, leukorrhea, pregnancy, labor and breast-feeding are manifestations of the transforming function of zang-fu organs, channels and collaterals, and qi and blood. PART ONE. THEORY Chapter 1 Characteristics of Female Physiology I. Uterus II. Menstruation III. Leukorrhea IV. Pregnancy and Labor 1. Pregnancy 2. Labor Chapter 2 Etiology and Pathology I.
